

## State of Resource Management: Latest Research and Best Practices for 2024

In the ever-evolving landscape of resource management, staying ahead of trends and implementing effective strategies is crucial for organizational success. As we delve into the current state of resource management, supported by research and leading practices in the RMI community, it's evident that several key observations and strategies are emerging to guide us through periods of growth and uncertainty.

## KANTATA™

### Use These Flex Workforce Best Practices for Better, Faster, Happier Teams

The professional services industry is more unpredictable than ever and it's up to each organization to determine the best way to stay agile in a time of constant change. For many, taking advantage of a "flex" workforce can help expand and contract resources and skills to match frequent changes in demand.

A flex workforce utilizes contract and part-time resources to supplement business needs, ensuring your organization can better react to times when demand suddenly decreases or increases. When businesses lack flexibility in their workforce – their teams are too big for incoming demand, for example, or they can not take on new work because they do not have enough capacity – these fluctuations can cause financial strain.

### The 10 Biggest Resource Management Challenges and Their Solutions

**kytes**  
by ProductDossier

Organizations deal with products and services that drive their revenue and profitability. But it is your people that understand, visualize, design, develop, and implement products and services to the customers of any business enterprise. It is a no-brainer that senior leaders must give the maximum focus and attention to resource management. However, as organizations grow both locally and globally, effective and efficient resource management hinges on the adoption of the appropriate resource management system or resource management software.

## RMCP® Spotlight

Katy Mabbitt, Vice President, Resource Management & Operations, DMI is our RMCP® Spotlight. Katy tells us how she chose to work in resource management, and describes how her path wasn't a straight line, but a delightful detour.

Our fifth annual **Resource Management Global Symposium** is less than one month away, and we're working hard to make this year's event bigger and better than ever!

We will have more sessions to choose from, more resource management automation tool vendors demonstrating the latest in RM tech, more opportunities to network with your peers and other industry experts, and fun!

You won't want to miss it.

**Register today, and we'll see you in Indianapolis, April 23-24.**

### Resource Forecasting

The RMI's second survey on Forecasting is now live. This survey will explore resource forecasting approaches and processes, outcomes, and automation support. Armed with this important benchmark data companies can compare and contrast certain aspects of the current state of their resourcing forecasting capabilities vs. their peer group, hopefully leading to making important and targeted improvements.

**It only takes a few minutes to complete the survey and participants will receive a complimentary copy of the research report when it's published.**

### Digital Transformation for Resource Management

The trend for digital transformation of resource and workforce management is accelerating while investment by technology providers in resource management functionality is also growing. During this session we'll highlight the latest in the digital transformation of resource management and leading practices for how RMOs and delivery teams can work together to take advantage of them.
