

The RMI hosted its seventh annual Resource Management Global Symposium (RMGS) in April. Centered on the theme, “Igniting the New Age of Intelligent Resource Management”, the event fostered a strong sense of community and connection. Attendees came together to exchange ideas, build relationships, and explore three key focus areas: Strengthening the Discipline of Resource Management, Advancing the Profession of RM, and Exploring the Intelligence with AI. These came to life through open dialogue, practical examples, and peer-driven insights. With interactive sessions and strong engagement, RMGS delivered actionable insights and lasting connections that will help leaders drive impact, accelerate progress, and advance resource management as a strategic business capability. ProFinda

Stop Managing Your Workforce. Start Orchestrating It

AI isn't replacing resource managers, it's turning them into strategic workforce architects. But the transformation only works with the right foundations in place. Fresh from the RMGS keynote stage, ProFinda's Seb Haire and Alison Driscoll break down what “AI readiness in Resource Management” actually looks like, why most organizations stumble, and how the ones getting it right are seeing ROI within months. Don't miss the key takeaways every resource professional needs to know. [Read the full article.](#)

Kantata

Is This the End of “Who's Available?” What Resource Management Will Look Like in 2028

What happens when “who's available?” is no longer the right question? As AI reshapes professional services, resource management is shifting toward outcomes, hybrid human-agent teams, and new measures of value. Drawing on Kantata and RMI research, this article explores five realities redefining the role by 2028—challenging outdated assumptions and revealing the capabilities resource managers must build now to stay relevant in a rapidly evolving, AI-powered future. [Read the full article.](#)

New Education Series: The Business of Resource Management Part One: RM Is Not Scheduling. It Connects Strategy to Results.

The RMI recently launched a new article series to help services leaders rethink resource management as a strategic driver of business performance, not just an operational task. The first article challenges the common perception of resource management as scheduling and coordination, reframing it instead as the critical link between strategy and results. It shows how resource management directly influences growth, margins, and delivery predictability, and why elevating its role is essential for sustained success. We encourage you to not only read the series, but share it with your executive leaders. [Read the full article.](#)

RMCP® Spotlight: Eric Mannweiler

Meet Eric Mannweiler, our Q2 RMCP® Spotlight! Eric is a Sr. Resource Manager at Docusign, Inc., who found his way into RM after transitioning from inventory control, quickly recognizing the overlap and opportunity to make an impact. He excels at creating order from complexity, recently redesigning staffing processes to navigate a highly complex annual planning cycle. Known for his listening-first mindset and hyper-focused attention to detail, Eric builds trust while delivering practical solutions. He recently shared his insight with the broader RM community as a speaker at RMGS, where he highlighted the critical role of soft skills in elevating the impact of resource management. Outside work, he supports nature conservation in central Indiana. [Learn more about Eric!](#)

INSIGHTS

The RMI conducts short research surveys to help professionals compare and contrast their resource management operations to their peer groups. Survey input is then turned into research reports. Click below to check out our current survey and recently published research reports:
