Do Leaders Truly Understand The Pressure Their Teams Are Under?

The professional services industry is constantly evolving, and recent research shows that leadership and the teams they manage aren't always on the same page about how those changes are manifesting in the field. The widening gap between leadership perception and the actual experiences of team members, particularly regarding workload pressures and client service delivery, poses significant challenges not just to organizational cohesion and effectiveness but also to employee satisfaction and retention.

The Future Shift: New Era of AI Enabled Resource Management

kytes
by ProductDossier

This eBook explores how RM is changing, especially in today's fluid economic environment. Organizations across industries have a growing need to continue driving efficiency with minimal costs and maintaining employee engagement. While traditional ways of RM are proving to be inefficient, organizations seek intelligent, AI-enhanced systems. As RM is directly proportional to a company's revenue and margins—optimizing resources can significantly impact profitability.

BIGTIME

Beyond Basics: Mastering Resource Management Techniques

How to Build a Strategic Resource Plan Without the Manual Lift of Spreadsheet: Whether you're still working with spreadsheets or beginning to explore new strategies, this ebook has something for you. We break down complex concepts into simple, actionable steps, offering valuable insights to enhance your competitiveness and drive long-term success.

RMCP® Spotlight

Meet Kerrie Kilford, Head of Resource Operations, QinetiQ UK, our RMCP® Spotlight for Q3! Kerrie, an RMI Advisory Board Member, has over 20 years' experience working across Project and Programme Management, Technical Business Operations and Resource Management and has been leading the resourcing and workforce planning team as part of Resourcing Operations for the past 6 years. She shares insight into what she believes makes a good resource manager and talks about her biggest resource management challenges to date.

Sourcing and the Gig Economy

The gig economy has changed the task of sourcing human capital. With a growing percentage of the workforce shifting to a freelance model, managing a flex workforce is essential. This survey will explore the implications of this mega trend by collecting important information on who is using the gig marketplace, how they are doing it, and the automation tools being used to support the needs of a growing flex workforce.

It only takes a few minutes to [complete the survey](#) and participants will receive a complimentary copy of the research report when it's published.

KANTATA™

The Impact of AI and Machine Learning on Resource Management

Artificial Intelligence (AI) has emerged as a game-changer in the business landscape, presenting unprecedented opportunities for organizations to optimize operations, drive innovation, and enhance decision-making processes. With AI poised to make a widespread impact on organizations in a variety of industries, how might it affect resource management? During this session we'll highlight ways in which RMOs can respond to the changes it's driving. RMCPs can earn .5 PCU credit for attending the webcast.
